ADVANCED MANUFACTURING TECHNOLOGY**

Contents

Volume 15

Number 3

September - December 2021

<i>No.</i>	<i>Title</i>	<i>Page</i>
1.	High Nickel Deposition at Low Voltage Electroplating Process by a Combination of Anions <i>H.P. Buwono, U.S. Amrullah, R.N.A. Takwim, M. Kaavessina and N.F. Nasir</i>	1
2.	ASPIP – Automatic and Assisted Definition of Assembly Sequences Based on Component Liaisons and Subassemblies Approach <i>R. Viganò and G. Osorio-Gómez</i>	15
3.	Heat Treatment Temperature Influence on the Structural and Optical Properties of Brookite TiO₂ Thin Film Synthesized Using Green Sol-Gel Route <i>N.D. Johari, Z.M. Rosli, J.M. Juoi and T. Moriga</i>	29
4.	Agent-Based Chemical Mechanical Planarization Qualification for Semiconductor Wafer Fabrication <i>S. Ramlan, M.H.F. Md Fauadi, N.H. Razali and X. Hao</i>	41
5.	PID Controller Design for DC Motor Position Analysis and Application to Ankle Rehabilitation System <i>M.A.R. Azizi, K. Osman, A. Jaafar and K. Suzumori</i>	55
6.	Universal Design Method Considering Physical Characteristics and Physical Load Based on Digital Human Model: A Case Study of Height-Adjustable Standing Table <i>I. Kato, T. Nakajima, S. Yamada and M. Inoue</i>	67
7.	Thermal Characterization of Indium Doped Zinc Oxide Coated Kenaf/Polyaniline/Poly(lactic Acid) Hybrid Composite <i>N.A. Sani, M.E.A. Manaf, J.A. Razak, M.I. Shueb and V.A. Doan</i>	81

Chief Editor

First and foremost, warm greetings to all the readers. We are very pleased to announce that the Journal of Advanced Manufacturing Technology (JAMT) **is now Q3 Scopus Indexed** and for its 32nd issue of publication. Currently, JAMT addresses three objectives; to provide a platform for the discussion and knowledge sharing on current and future issues, practices, innovations and trends of engineering and information technology amongst the academics, researchers and practitioners, to promote and encourage exploration and dissemination of knowledge in relation to engineering and information technology, and to publish papers in the areas of engineering and information technology particularly green technology, system engineering, human-technology interaction and emerging technology.

JAMT will continuously be a great and significant contribution to the Faculty of Manufacturing Engineering and UTeM. JAMT strives to attract and engage a global readership that is primarily academic. This move is in line with the mission of university "To Be One of the World's Leading Innovative and Creative Technical Universities" JAMT welcomes any papers, either written individually or co-written, which will make a substantial contribution to the development and success of the journal. Please do not hesitate to contact us for any uncertainty or enquiries.

I wish to take this opportunity to thank all the individuals involved in this publication particularly the editorial and technical boards for their tireless efforts in ensuring the continued success of JAMT. Moreover, my gratitude is extended to all contributors.

Best wishes and thank you for your support.
